REALCAST BOARD- FORM

Board-formed concrete isn't a new style. It's been around for a long time, but with current design trends, it's quickly becoming a very trendy look. With the detail of natural wood pattern directly formed in the concrete face, board-formed concrete offers a unique design for any of your surfaces.

REAL CONCRETE BOARD-FORM. ANYWHERE.

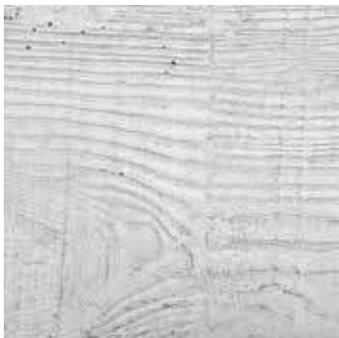

REAL CONCRETE PANELS

Installing real concrete walls is a costly and complex task. This is where RealCast Concrete comes in and allows you to transform any space you want with the fresh, cool, modern look of concrete walls. Using a propriety concrete formula, RealCast Board-Form planks give you the freedom of achieving that look no matter where in your house.

These planks are strong, durable, easy to install, and are 100% concrete. With a normal saw blade, some strong adhesive or screws, and a few hours, you can install your very own board-form wall.

STYLING AND PROFILING.

RealCast Board-Form comes in 4 colours.

LIGHT GREY

MEDIUM GREY

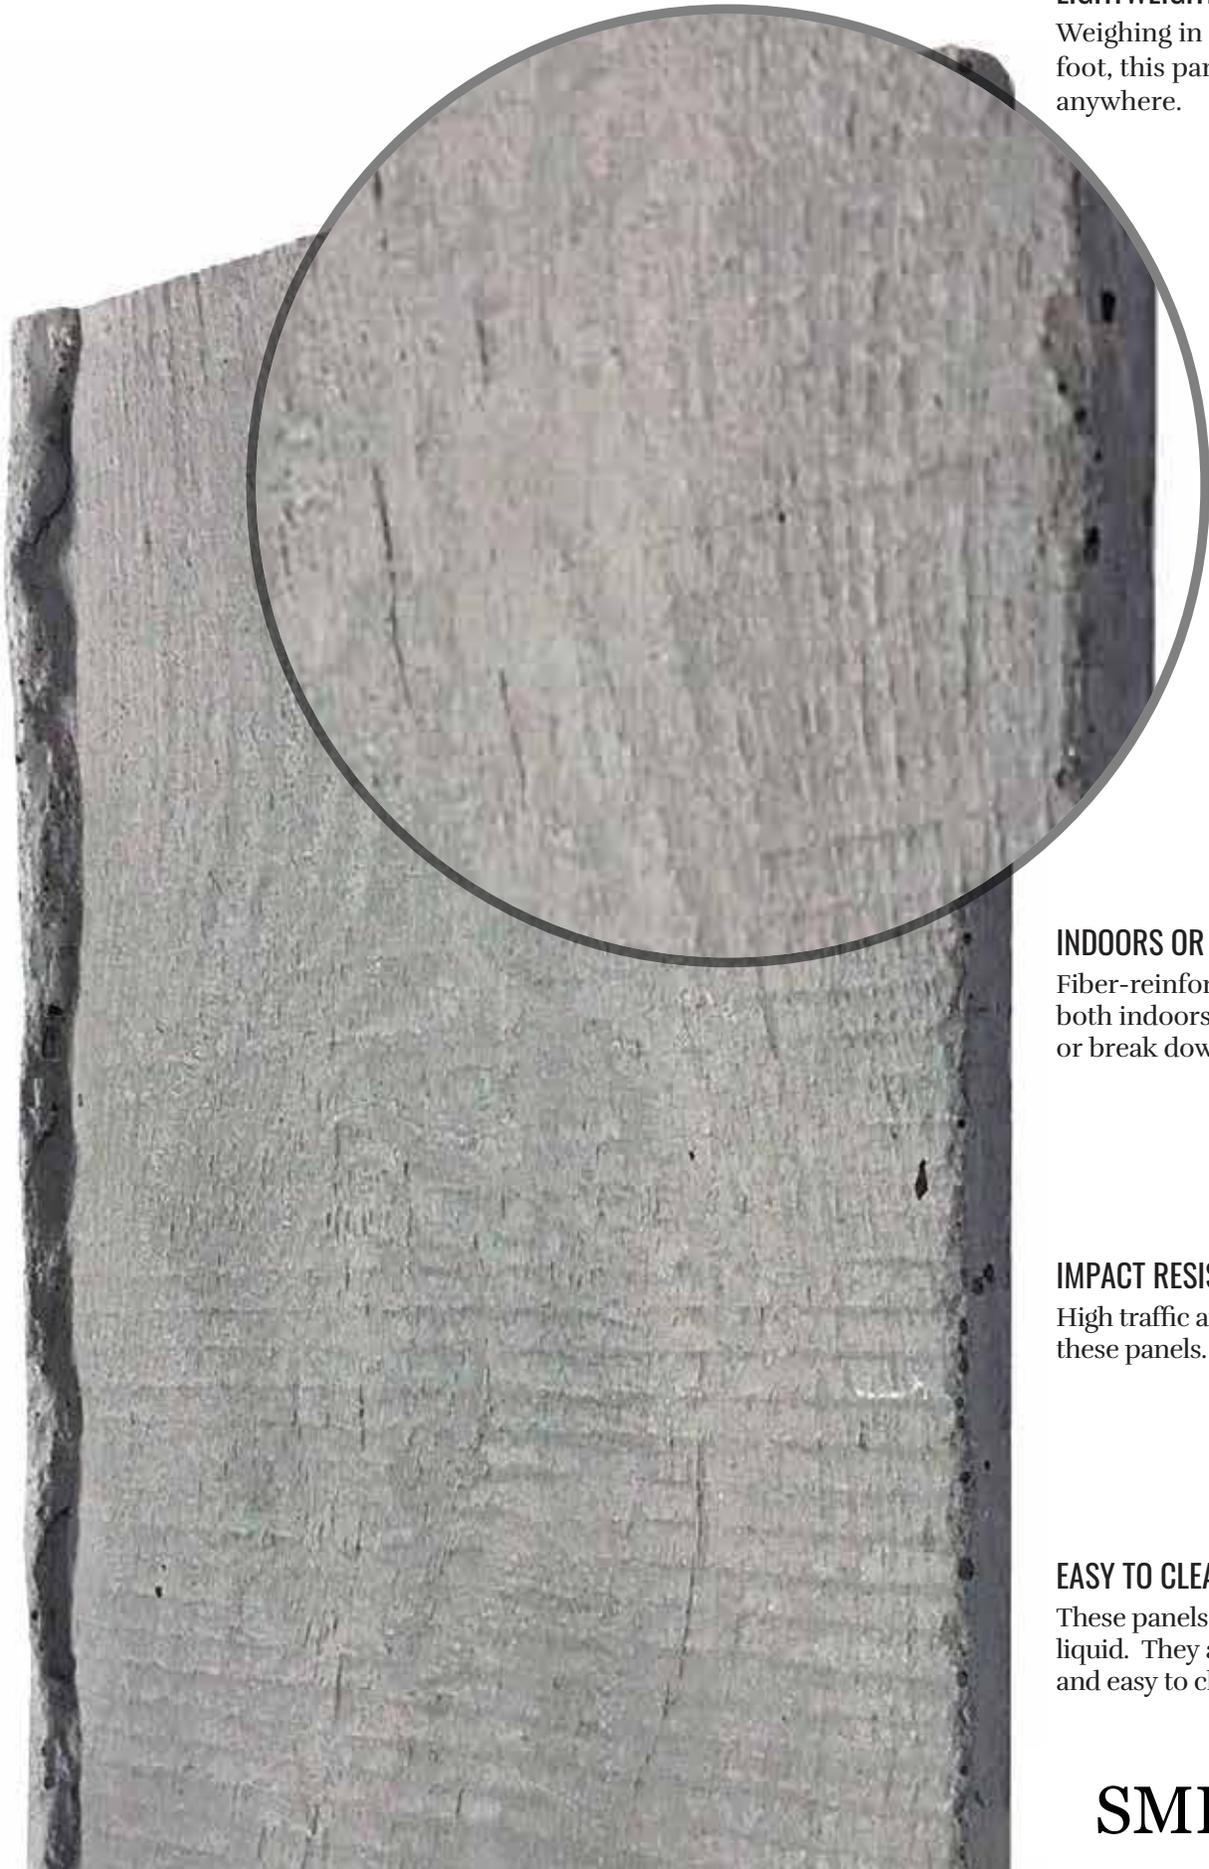

NATURAL GREY

CHARCOAL

BENEFITS OF REALCAST CONCRETE.

LIGHTWEIGHT

Weighing in at only 2.5 lb. per square foot, this panel can be installed anywhere.

INDOORS OR OUT

Fiber-reinforced concrete can be used both indoors or out. Doesn't crack, fade, or break down.

IMPACT RESISTANT

High traffic areas aren't a problem for these panels.

EASY TO CLEAN

These panels are sealed and won't absorb liquid. They are also very scratch resistant, and easy to clean.
